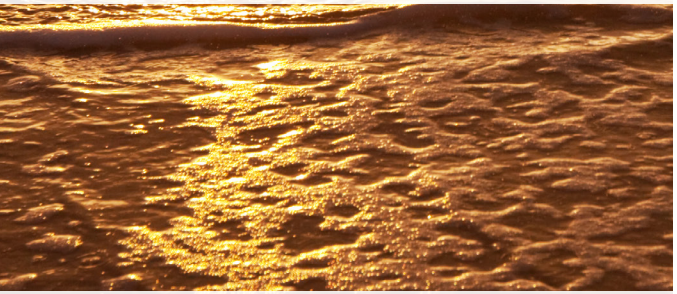
LOOK'N GREEN
FASHION SHOW
MALAGA

Spain is the sun

All we produce, all we do and all we are is related with the sun.

That sun that gold plates our coast and fields, ripen our fruits and cereals, warms our personality, light up our artists and generates a clean and sustainable energy, is our life.

Our work, our leisure and our culture revolves around that wonderful star with which nature presents us and we happily share with our visitors as they value it as much as we do.



El IES El Palo y sus socios europeos del Proyecto ISCI (Innovation and Sutainability of Creative Industries), tienen el placer de invitarles al desfile de belleza sostenible: "LOOK'N GREEN" donde alumnado de 5 centros europeos exhibirán sus estilismos innovadores completamente respetuosos con la salud y el medioambiente"

Fecha y hora: 4. de Diciembre 2013 a las 18:00 horas
Lugar: Auditorio Edgar Neville
Calle Pacífico 54, Málaga

Denmark is the wind

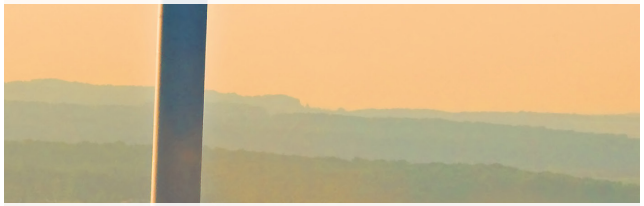
In Denmark we have a lot of windy days.

Because of the wind we have a lot of windturbines, both off shore and on land. We produce a lot of alternative wind energy, and even so much that we sell some of the energy we produce to Germany.

In the landscape you can se the windturbines standing like sculptures, some people like them and some don't.

If you go to the west coast of Denmark a windy day, you can see big waves and walk on the beach and maybe you can be lucky and find amber. But it's difficult and you have to have the "nose" for it.

There is more or less always windy in Denmark, in the winter time it's cold and often a lot of wind, and in the summertime if it's hot the wind will cool you off a bit.



IES El Palo and the European partners in the ISCI project, have the pleasure of inviting you to the sustainable fashion and beauty show: "LOOK'N GREEN" where students from 5 European countries will show their innovative designs, completely respectfull for the health and environment.

Date: the 4.th of December 2013 at 18:00 o'clock
Place: Auditorio Edgar Neville
Calle Pacífico 54, Málaga

Scotland is the sea

In Scotland we are never far from the sea, our seas can have many colours from turquoise around the Western Isles, to deep blue under the famous Forth Bridges or it can form a wild white spray for the surfers at the top of the land. It reflects our high skies, our links to the rest of the world for trade, provides a living for our fisher folk and surrounds us with wild beauty with the fish, birds, seals and other sea mammals that live in it. We use its strength to capture wave power to provide an alternative to fossil fuels.

Se ruega confirmation:
